

YubiEnterprise Delivery

Provides IT teams with powerful capabilities to manage the delivery of hardware security keys to users globally and accelerates the adoption of strong authentication

Hardware security keys offer the strongest protection

Hardware security keys, based on modern authentication standards, have been proven to stop account takeovers in their tracks and reduce support calls to the helpdesk by up to 92%. However, distributing keys to users dispersed globally has been a challenge. Getting keys into users' hands is critical and needs to be fast and easy.

YubiEnterprise Delivery simplifies YubiKey distribution

YubiEnterprise Delivery is an enterprise-ready cloud service that streamlines the distribution of YubiKeys to end-users, serving both domestic and international locations including residential addresses. And, organizations can empower users to secure important resources more quickly.

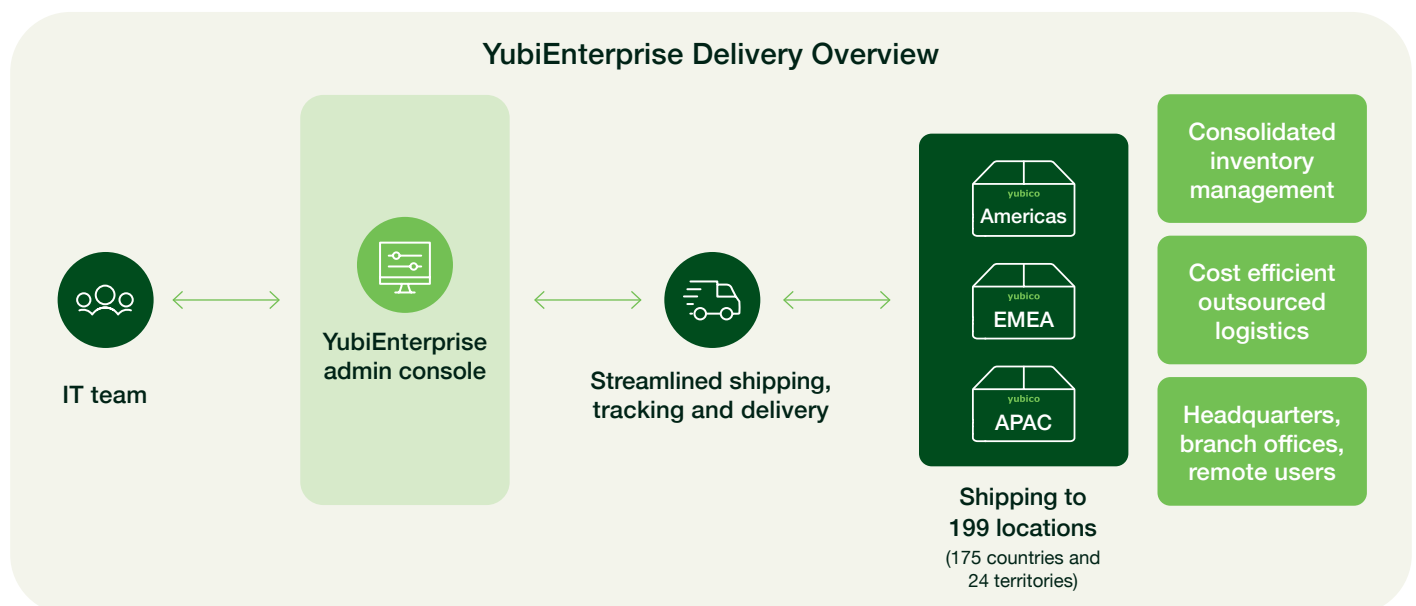

YubiEnterprise Delivery ships YubiKeys to 199 locations (175 countries and 24 territories) around the world.

Key benefits—with YubiEnterprise Delivery organizations can:

- Experience cost-effective, turnkey delivery with shipping and tracking of YubiKeys to users, all handled seamlessly by the experts at Yubico

- Gain visibility into an organization's available inventory and consumption patterns (i.e. how many were bought, how many were shipped, and how many are available)
- Access the capabilities of YubiEnterprise Delivery through an administrator console or integrate YubiEnterprise Delivery into your IT flows and service catalogs using public APIs
- Place individual shipment requests or conveniently upload shipments in bulk through a CSV file
- Get immediate details on shipment costs and applicable details depending on the shipping region
- Generate reports for all shipment requests over time for interdepartment cross-charge
- Streamline business processes through introduction of the Global PO
- Manage RMA / shipment anomalies directly through the console
- Manage all [YubiKey as a Service](#) enterprise subscription plans quickly and easily

YubiEnterprise Delivery Overview

Conduct Comprehensive Inventory Management

With [YubiEnterprise Delivery](#), organizations can easily consolidate inventory management which includes centrally managing all YubiKey inventory until shipment, and even consolidating inventory across multiple purchase orders.

Getting started with YubiEnterprise Delivery

It's easy to get started with the Delivery service. Once a purchase order is processed, an organization (org) is created in the YubiEnterprise console and the purchase order inventory is enabled for shipments. The customer is then directed to the YubiEnterprise Services console to register and request shipments to any number of destinations.

[YubiKey as a Service](#) customers can easily track their subscription inventory directly in the console, conduct self-service and request shipments against their subscription entitlement. Actions such as requesting additional keys, adding buffer stock, requesting replacement stock and other actions are possible directly from the console.

Easily delegate administrators to place orders for various locations

Any individual who has administrative rights to the YubiEnterprise console can place orders for keys through the console. And admins can be delegated across locations so that they can best gauge the number of users who will need YubiKeys and request shipments all at once, or tiered over time as needed.

Customer admins can also delegate access to their team members to log into YubiEnterprise console and create shipment requests. For each shipment request, YubiEnterprise Delivery will automatically calculate the appropriate shipping fees / taxes and VAT based on the destination address and this information is provided in the console. At the end of the month, the customer will receive an invoice from Yubico for the shipping fees and taxes/VAT.

Enter and track shipments easily with a cloud-based administrative console

Users can sign into the YubiEnterprise Console and go to Shipment Requests. Each shipment request can be individually tracked. You can also download a list of all shipment requests and associated details.

YubiEnterprise Delivery enables customers to request shipments for up to a year after the initial purchase order and will hold the customer's inventory, which includes both regular or custom keys.
